

Mixing Directions

(Start mixing 1 ½ hours before party)

NEVER PUT ICE INTO THE MACHINE!!!!

- 1) Pour bottle of mix into the 5 gallon mixing jug.
- 2) Pour (1) 1.75 liter bottle of tequila into the mixing jug.
- 3) Fill the jug to the 3 gallon mark with COLD water and MIX WELL!
- 4) Pour some of the completed mix into a smaller container (the 5 gallon jug will be too heavy at first).
- 5) Pour completed mix into each bowl to the MAX LINE ONLY. The word MAX is printed in raised plastic on the side of each of the bowls. Turn all switches to the up position
- 6) IMPORTANT If you are going to use a second batch, premix and chill immediately. Top off bowls to the MAX LINE frequently. Failure to top off will result in LONGER freeze time.
- 7) This is very important, Party & have FUN!
- 8) When the party is over, Turn All switches to the down position (off) then unplug the machine from the outlet.
